

Water Utility Resource Management Plan Coalition Members Focus Group Meeting

Uncertainties about population growth, the climate and extended drought have generated concerns about water. These issues affect areas of Grand and San Juan counties including the City of Moab, the Grand Water & Sewer Service Agency, and the San Juan Spanish Valley Special Service District.

These agencies have formed a coalition of water providers for the purpose of studying long-term water and policy planning.

**Join the Coalition group by Zoom on Dec. 14 at 6 p.m.
for an informational meeting and project update.**

This virtual meeting will be a focus group of Coalition members to discuss project status, future activities and to receive feedback from the Coalition. The consultant team will review project scope and purpose, existing data, and discuss future activities and schedule.

Residents are invited to submit questions in advance and may attend the meeting by Zoom at
